

The Tuf™ Radio

The next generation emergency preparedness radio brought to you by Freeplay Energy

The Tuf solar & wind-up multiband radio is an essential part of any emergency preparedness kit. Information, communication and light are life savers in situations where normal utilities are down. Tuf radio provides regular and specific weather information (NOT suitable in Australia) as well as emergency lighting and cell phone charging, without the need for disposable batteries or access to an electricity source. You are guaranteed never to be without power again.

NO BULBS REQUIRED, EVER

NO KEROSENE

CHARGE VIA USB

MOBILE PHONE CHARGING

(Mobile phone not included)

Specification: Tuf™ Radio

Dependable, self-powered solar radio, flashlight and mobile phone charger combination.

NAME

Tuf™ Radio

PRODUCT DESCRIPTION

The Tuf radio is a rugged, robust self-powered solar radio, flashlight & emergency phone charging combination designed specifically for emergency preparedness kits and for use in disaster relief management.

POWER SOURCE

Solar Panel

Poly-crystalline solar panel, 5V 30mA, with solar charging indication. This serves to play the radio or to charge its batteries without having to wind.

USB

The Tuf may also be fully recharged via a standard USB cable.

Power Management

A rechargeable 3,6V NiMH rechargeable battery pack stores the energy generated from human and solar power.

LONG LIFE BATTERY OPTION

Because products for emergency preparation applications are often stored without use for long periods Freeplay offers the option of a low self-discharge battery. This will ensure that the battery is able to withstand storage for extended periods.

FEATURES

12/24 hour clock, Backlit LCD display, Battery level indicator and tough carabeneer carrying handle.

MOBILE PHONE CHARGING

USB 5V output port for recharging phone and light personal electronics. The Tuf has a USB power-out socket that delivers power from the alternator to a mobile phone.

SPEAKER

40mm 8 Ohm speaker with metal speaker grill
Headphone listening socket

ANTENNA

FM: Telescopic antenna
AM (MW): internal ferrite rod antenna.

FREQUENCIES

Digitally tuned, PLL (phase-locked loop) radio
FM: 88-108 MHz
AM (MW): 530-1700 kHz
SW: 3-22 MHz (non USA version)

DIMENSIONS

Length: 144mm
Diameter: 60mm
Weight: 300g
