

Snugpak IONOSPHERE™

**A Spacious one person
lightweight compact
modular shelter / tent**

The Ionosphere™ can be used without the fly as a stand alone mosquito shelter / barrier for those nights when you may want to sleep under the stars or just need protection from the pests and not the elements.

WARNING:

KEEP ALL FLAME AND HEAT SOURCES AWAY FROM THIS TENT FABRIC. THIS TENT MEETS THE FLAMMABILITY REQUIREMENTS OF CPAI-84. THE FABRIC MAY BURN IF LEFT IN CONTINUOUS CONTACT WITH ANY FLAME SOURCE. THE APPLICATION OF ANY FOREIGN SUBSTANCE TO THE TENT FABRIC MAY RENDER THE FLAME-RESISTANT PROPERTIES INEFFECTIVE.

Assembly Instructions for the IONOSPHERE™

- X1** Large Curved Pole
- X1** Small Curved Pole Grey Tipped
- X16** Alloy Stakes

Additional Ultralight Alloy Original Stakes can be purchased separately. Aftermarket stakes can also be used with this tent whether it be with the loop webbing or through the secondary grommet available

- a. Insert the tent pole ends into the grommets in the corresponding webbing straps.
- b. Once all the pole ends are inserted into the grommets then take the Ultralight Alloy Stakes that came with the Ionosphere™ and stake down the corners and the webbing straps with grommets. Add additional stakes to other stake points as needed.
(Note: there is a secondary grommet on webbing strap for different style stake if needed)
- c. At this stage the Ionosphere can be used as a stand alone insect shelter, if so desired.

- a. Take out the main body (Inner Tent / Mosquito Netting) and unfold and spread it out.
- b. Assemble Pole Sections - Carefully unfold the pole sections and allow them to slide together by inserting within one another.
- c. Insert the poles into the pole sleeve channels
(We recommend to always push poles through, do not pull through sleeve channels).

- a. Take out the Fly (Outer Tent) and unfold and spread it out. Then drape the Fly over the main body matching up the door area and foot area and then connect the two.
- b. To connect the Fly to the main body simply use the Velcro attachment points to connect it to the Poles where accessible through the Pole Sleeve Channel. There are two attachment points to attach the fly on both Pole Sleeve Channels.
- c. To gain access now simply unzip the fly access zipper and also the inner tent access zippers.
